BRUNNER

MANUFACTURED IN U.S.A.

BRUNNER MANUFACTURING

If it is a challenging component that you are designing, let Brunner Manufacturing be the company you partner with. We can cold-form splines, 12 points and other special configurations on our progressive headers. Our high-speed Formax part formers give us the ability to quickly change from one part to the next, reducing set-up time and providing substantial savings to our customers.

MACHINE CAPABILITIES

- Multi-Die Bolt Makers
 - Diameter: .25 - .875 inch (M6-M22)
 - Length: Max 8.26 inch (210 mm)
- Progressive Headers (up to six dies)
 - Diameter: .25 - 1.375 inch (35 mm)
 - Length: Max 21 inch (for parts .858 inch in diameter or less) (533 mm)

BRUNNER MANUFACTURING ADVANTAGES

- State-of-the-art climate controlled cold heading shop
- 100% USA made steel rod purchased from a local steel mill
- In-house tool room
- 25 Multi-Die heading machines
- A2LA Certified Metallurgical Lab
- Heat Treat and Metal Finishing
- ISO-9001-2015 Certified
- Inventory Management/ Distribution Services

Wheel Bolts

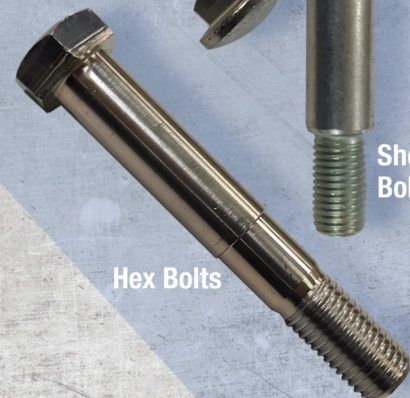

Hex Flange Bolts

Carriage Bolts

Shoulder Bolts

Hex Bolts

Knurled Bolts

OTHER EQUIPMENT

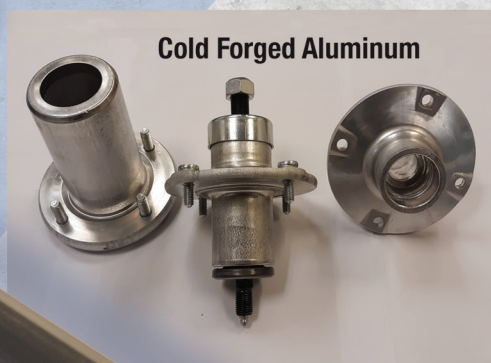

- 48 CNC lathes for machining of near net shaped parts
- 11 state-of-the-art vertical machining centers
- 22 high production cross drilling machines
- 500, 1100 & 1500 ton special presses for Cold Forging of Aluminum
- Several state-of-the-art centerless grinders

SPECIAL FORMED SHAPES

SINCE 1963

Near net formed parts machined to a precision finish.
